CHAPTER TWO

# MERF Stand

## Look Ma'...No Handles!

A new concept in small, robust kit stands. . .Matthews does it again! We have taken the proven small stand concept of reverse folding legs and gone one step further by introducing MERF — which features a secure clamping system that eliminates T-handles!

Stuff it into your backpack or small portable lighting kit; when extended MERF will give you a full 7'5" (277cm) stand that features heavy wall, lightweight aluminum tubing for added strength and stability that is even more compact than

other stands because of the unique Cam clamping system that holds the riser tubes firmly in place. You will be confident that your precision lighting instruments are secure when positioned on this robust, compact stand. Should in-field repairs become necessary, MERF is assembled with readily available nuts and bolts — not rivets!

Once again it's Matthews Studio Equipment. It's bold, it's new, it's MERF — 'Technology That Complements Your Imagination'.

### SPECIFICATIONS

Max Height.....	89" (7'5" or 277cm)
Closed Length.....	20" (51cm)
Weight.....	2.5 lbs (1.1Kg)
Capacity.....	9lbs (4kg)
Footprint Diameter.....	24" (61cm)

# Reverse Stand

Now here's a clever idea that really complements your imagination — Matthews Reverse Stand. An innovative approach to folding a stand without compromising the stand's integrity or capacity. It's a tough little stand with a really neat feature!

The dimensions are particularly impressive when you compare the maximum height you're able to attain against the minimum folded length. And, it's lightweight, strong and extremely durable. However, should there be a need for repair, it's constructed using nuts and bolts — not rivets — making repairs a whole lot easier! Comes with 4 risers and a 5/8 pin. Now that's versatile!

***Why wouldn't it be... it's Matthews.***

#### DIMENSIONS

Height..... 83.5" (212cm)  
Weight..... 3lbs (1.4kg)  
Footprint..... 32" (81cm)

Folded Diameter..... 3" (7.5cm)  
Capacity..... 11 lbs (5kg)

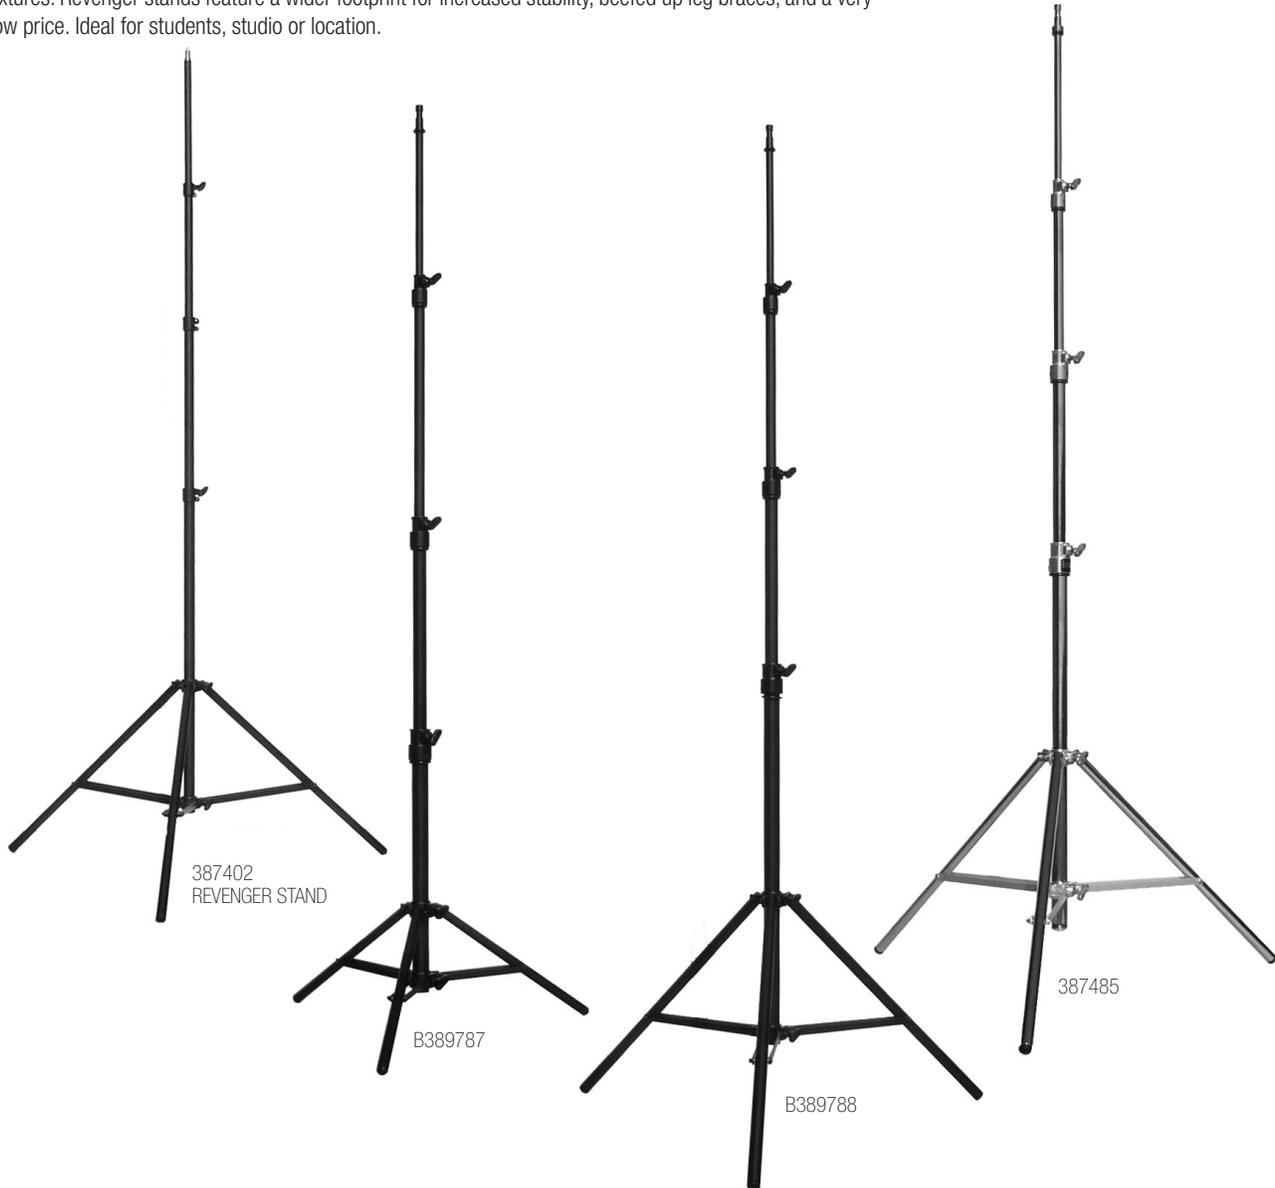

B387486 Reverse Stand ..... List Price \$88.00

STANDS

# Revenger Stands

Designed primarily for use in lighting kits, these stands are compact and light weight, ideal for assembling custom lighting kits or replacing your current stands. Matthews Revenger Stands employ a 'brake shoe' system for locking off the riser tubes as opposed to 'pinch castings', therefore permitting the use of heavier fixtures. Revenger stands feature a wider footprint for increased stability, beefed up leg braces, and a very low price. Ideal for students, studio or location.

# Back Light Stand

## FALCON. Matthews Newest Kit Stand.

The Falcon is a lightweight aluminum twelve foot stand that is both robust and rugged. All risers are braked and not 'pinched' and, as always, Matthews stands are manufactured and assembled using nuts and bolts — not rivets! Finished in a non-reflective flat black finish, the Falcon stand is a strong triple-riser lightweight stand that is ideal for either location or studio work. The mounting pin is a heavy-duty 5/8" (16mm) steel double-cross pinned spigot.

The Matthews Back Light Stand is configured so that accurate positioning of the back light may be achieved. Used for either background illumination or back lighting the subject. An extendable column allows for a wide range of heights and includes an interchangeable 5/8" pin that positions the light almost directly on the floor.

## The History of C-Stands™

Matthews Century Stand circa 1972.

**In 1974 Matthews Studio Equipment introduced the industry's first folding base C-Stand. (C-Stand and Century Stand are registered trademarks of Matthews Studio Equipment.) Matthews now produces a wide range of C-Stands and related accessories to assist the motion picture, television and photographic professional in lighting and lighting modification support.** The term 'Century Stand' goes back to the early days of motion picture production. Before there was artificial lighting the stages would revolve to allow for continuous overhead lighting from the sun. Large reflectors would be positioned to bounce or kick the overhead light up onto the stage and illuminate the set and actors. These reflectors were made in many sizes but it seems the most popular was the 100 inch, or 'century', sized reflector. In later years studios, grips and gaffers began to manufacture the earliest versions of what we now call C-Stands. The original C-Stands had welded bases that did not fold up or did they adjust but the fact that they easily nested together made them invaluable on the stage. Century Stands or 'C' stands are an important component in the image makers arsenal of tools. These popular stands are available in many different configurations, lengths and finishes. The unique staggered leg design allows C-Stands to be nested and therefore be placed extremely close to one another on set. The lower leg can also be slid under many objects. The C+ offers a removable base for the risers making disassembly for travel simple and easy without being cumbersome or having the awkwardness typical of other manufacturers. The sliding leg allows for use on stairs, off curbs and even as high as a desk or counter top. Patents applied for and pending. Fast, easy opening and closing.

# Baby Stands

## The MatthLINK Stand

The MatthLINK Stand is truly the missing link! Designed to replace everything from full apple boxes to pancakes, this flexible stand is designed to work with anything that has a 5/8" baby pin, extending from the ground up to 17 inches on center. The MatthLINK Stand can be placed over cable, tucks neatly into corners, and is easily stored by the dozen in a milk crate. This unique design replaces the old Baby Plate screwed to any apple box configuration. Save your apple boxes for what they were made for...SITTING!!!

Folded Base.....	4.5" (114mm)
List Price:	\$375.00

# Digital Stands™

Matthews Digital presents two new, high-quality lighting stands for the demanding professional. Innovative, robust and durable, the Matthews Digital lighting stands are becoming an integral component of location and studio lighting packages. Additionally, each riser section is spring dampened, ensuring the stand may be safely lowered. Designed to be stronger and lighter than other manufacturers' more expensive aluminum combo stands, Matthews Digital Stands are also lower in cost.

# Magic Stand™

This stand is truly magical! With the Runway Base added, the Magic Stand can be a regular rolling light stand. It can be a high rolling light stand, and it can also convert to a two section light boom with its own rolling stand. Its versatility is truly magical, whether a light needs to be placed at floor height, or behind as a hair light, or over a table for a product shot. This stand can do it all! Made with a standard 1-1/8" Junior Pin at the bottom, the Magic Stand riser could be added to the Combo Stand as a very unique stand extension or inverted to hang from a C Clamp into the set. The top riser incorporates our Magic Finger™. A stand that has been copied, but not yet duplicated!

## 999042 Magic Stand — Complete w/Runway Base

Maximum Height..... 150" (3810mm)  
 Minimum Height..... 54.5" (1384mm)

 List Price: \$393.00

RUNWAY BASE FOLDS FOR EASY STORAGE

# Hollywood Junior & Senior Stands

Designed for larger lighting fixtures, these stands are built with steel legs and steel riser assemblies. These stands provide a stable rolling base for Junior and midsize lighting fixtures. Equipped with universal Posi-V-Lock Junior Receiver with pop up 5/8" male pin, the Senior Stands are made for fixtures weighing up to 88 pounds. Please refer to the technical specification for the weight limitations of each stand. Matthews casters are locking and non-marking. Made from steel components not plastic and will provide years of durable service.

**IMPROVED!**  
 Unlike others, Matthews rolling stands track in a straight line – especially important when moving overheads or butterflies. No more foot castings. Wheels are protected when folded.

# Hollywood Overhead Stands

Roller Stands, or Overhead Stands as they are often called, utilize all steel tubes and legs. Developed for flying Butterflies and Overheads on location and supporting large backdrops in studios, these stands feature wide bases for stability and terminate in the new 4.5" Grip Head. Plates now feature two holes of 3/8" and 5/8" diameter that eliminate any confusion. New casting offers positive lock in all directions. The strongest and most popular 4-1/2" Grip Head in the industry. Guaranteed to hold. Matthews casters are locking and non-marking. Made from steel components not plastic and will provide years of durable service.

# Mini Mombo

## The New Hi Stand of Choice by Professionals All Over The World.

### The New Mini Mombo Stand.

If you do not need all the potential height of the Mombo Combo Stand but rather would like a lighter weight stand with almost as much reach as the Mombo Combo please consider the new Mini Mombo from Matthews. Matthews has engineered the Mini Mombo to achieve the much desired 'lower working height' required when mounting either large flags and butterflies or heavy lighting fixtures.

The Mini Mombo 4-riser stand has a maximum height of over 17 feet and will easily handle fixtures over 80 pounds. Great for overheads and frames. Like all Matthews stands the Mini Mombo packs a lot of punch! It's strong, robust, and the Mini Mombo's Rocky Mountain leg will offset uneven terrain to ensure a firm, stable and sturdy footprint.

377585

### Mini Mombo Overhead/Light Stand

#### Specifications:

Closed Length.....	66.5" (169cm)
Loading Height.....	64" (162cm)
Maximum Height.....	17'4" (529cm)

Weight.....	34 lbs (15.5Kg)

List Price: \$575.00

366068

### Caster and Brake Assembly

Position your Mombo exactly where you need it with this rugged and robust wheel set. Foot actuated brakes lock both wheel position and rotation. Matthews casters are locking and non-marking. Made from steel components not plastic and will provide years of durable service.

List Price: \$250.00 Set of 3

# Mombo Combo — “Daddy Long Legs”

The Mombo Combo Stand achieves an incredible height of 22 feet. Because of this height, it features an extra-wide base and incorporates a collar for attaching stabilizing Guy wires or ropes (Matthews #377578-40). The Mombo Combo legs are made of rectangular steel tubing and are internally reinforced with a Matthews engineered gusset assembly. This is absolutely the strongest stand of its type in the business!

**CAUTION:** Slight wind can create a tremendous hazard at the heights attainable with this stand. The use of stabilizing cables or guy ropes is recommended.

## 377583 Mombo Combo Stand - Standard Finish

# Skyscraper

Over the years Matthews Studio Equipment (MSE) has pioneered in the development of large, heavy duty, safe and easy to operate, cranking light stands.

STANDS

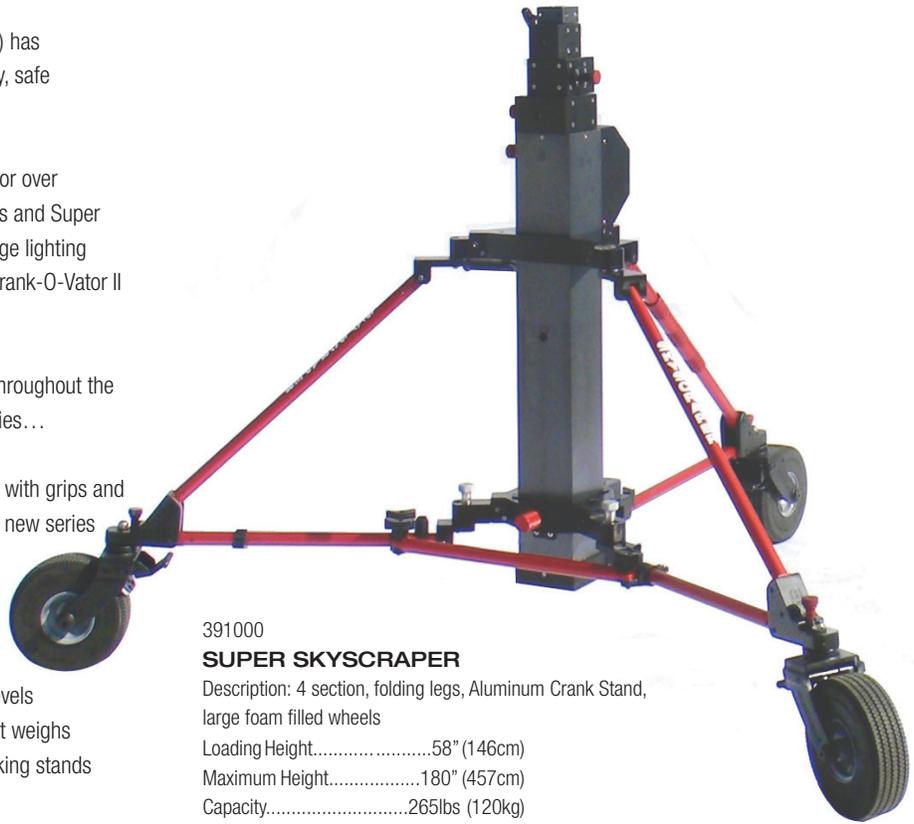

The original Crank-O-Vators served the industry for over 20 years and many are still in use. The CineVators and Super CineVators provided electrical assist to raising large lighting fixtures and eight years ago MSE premiered the Crank-O-Vator II series of stands...

Thousands of these veteran stands are working throughout the world serving the international production industries...

During the last two years we have been speaking with grips and gaffers throughout the world and formulating this new series of stands which we call SKYSCRAPER...

SKYSCRAPERS offer the production professional a very sturdy, robust lighting stand that loads at a lower height-raises to much higher operating levels and because it is manufactured from aluminum, it weighs significantly less than any of the other large cranking stands in our industry... The square tube design will significantly reduce any rotational torquing.

There are three models of the SKYSCRAPER stands suitable for both stage or location work. All models feature lower loading heights, EC certified cranking systems, a unique safety locking system on all risers and because of the aluminum construction, greater ease of handling without sacrificing safety. These stands are easy to maneuver when in the folded configuration for transporting and do not require an additional transport cart.

## Lo Boy SKYSCRAPER

Description: Under Development

Matthews newest member of the Skyscraper family of stands. At press time we did not have photos or specifications, however, the Lo Boy will be available in the second half of 2012. Contact your Matthews dealer for updates.

The collapsible design allows for space saving storage/transporting and moving.

As with any stand raising heavy fixtures to considerable heights, guy wires are strongly recommended to ensure safe operation while eliminating fixture movement.

'Knocker Lockers' safety feature ensures against column dropping should cable fail.

Crank handle shown folded away to prevent inadvertent lowering of the fixture.

Stablizing brace ensures rigidity of folded legs, shown in locked operating position.
